

Keep Your A/C Going!

## GROUNDBREAKING & INNOVATIVE

The first-of-its-kind, iFLO Pro® is a smart automated device that dispenses a bio-enzymatic cleaning solution directly into the A/C drain pan and drain line, actively breaking down and flushing out the build-up that leads to clogs, floods and shut-downs

### Why iFLO PRO®

- Automatically cleans your A/C drain line and protects your home from A/C leaks, water and shut offs
- Prevents emergency service calls
- Keeps your A/C clear of clogs year-round
- Preserve the life of your air handler
- Enjoy peace of mind and eliminate HVAC nightmares

### How it Works:

- iFLO Pro® requires professional installation with Float Switch monitor and 24 Volt connection
- A smart connected device powered by the iFLO PRO® App
- A real-time dashboard to monitor your home and your device
- iFLO PRO's connected float switch will instantly notify us if your A/C is backed up

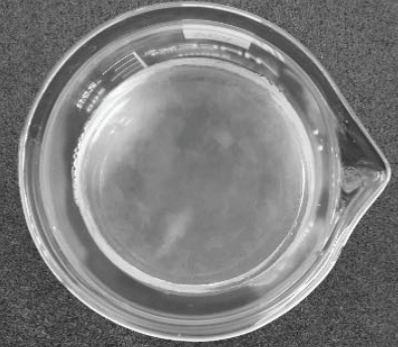

- Creates a proactive approach to drain clogs
- Supplying you with a professional grade cleaning solution for continued protection

## iFLO PRO® Stops \*Zooglea From Clogging Drain Lines

BEFORE

AFTER 72 HRS

\* **Zooglea** forms when germs travel through the air combining with other microscopic biological particles like dust, pollen, and pet dander. It builds up and becomes thick enough to clog your drain lines backing up your A/C and causing leaks inside your home.
